

30 Piece Adapter Kits

A great **time saver** for those instances where you are required to make connections with multiple connector types. These adapters are **made from high quality materials** to ensure **best performance and low insertion loss**. Combine with our universal Quick Connector and you have a fast and convenient system for hooking your connectors up to a wattmeter.

The universal version comes with standard connector types such as UHF, Mini-UHF, N, BNC, TNC, and SMA, and is very useful for many different applications.

Our wi-fi version comes with connectors more specifically targeted for all your wi-fi connection needs. Included in this version are N, TNC, SMA, BNC, MMCX, and Reverse Polarity connectors for easier wireless LAN interconnects.

Both kits come packaged in a soft, compact zippered case which provides excellent protection, easy organization, and enhanced mobility.
